4. FACULTY ADVISORS

The College has adopted in principle the policy of faculty assisting in academic advising of students. Some faculty may feel their efforts would be more useful in other areas and, consequently may not want to be involved in advising. Since it is time-consuming to get full response to a matter like this, please give a negative response. This means that, unless I hear from you

to the contrary, I will proceed on the basis that you wish to participate.
